As promised, some more changes!

Bob (in Erin's absence) – checking to make sure OGC is ok with this new version.

Rachel – please let me know if these changes are ok from RD's side. Meaning has not really changed.

The IO just wanted a few different places of wording and they added additional info into the background section.

Thanks,

Annie

I've added one comment. But ultimately, I'm just reviewing for accuracy and OPP needs to decide what the message should be.

Hi Rachel and Erin,

We received the feedback from the IO in the forwarded email below. In an effort to answer Debby's questions and clarify our intent, I made some changes (in tracked changes). Please take a look and see if this answers Debby's questions to your satisfaction. Happy to look at any other suggestions you may have as well.

Thanks,

Annie

Do we know what warning California is requiring? Cancer? Or birth defects/other repro harm? I had assumed it was cancer, but this doesn't say. Shouldn't it? And if so, it seems like we should say what our conclusions are. It seems to me this raises more questions than it answers.
